INVESTOR DILEMMA: 3 PAIN POINTS

Seeking Stability in returns while requiring tax efficiency

- Relatively better risk adjusted post tax returns

Avoiding Reinvestment Risk while ensuring optimal asset allocation

- Low Spreads in Arbitrage
- Reinvestment risk in fixed income

High Taxation on fixed income investments

- Capital Gains & Interest Income at Slab Rates
- Problem at higher income tax bracket

Income Plus Arbitrage Funds aim to offer best of both worlds (Relatively better risk adjusted returns with tax efficiency*) → Flexibility to switch between debt schemes and arbitrage schemes → Aim to offer relatively stable & better post tax returns over a holding period more than 24 months*

NEED OF THE HOUR: INCOME PLUS ARBITRAGE FOF**

- Aim to provide Better Return to Risk Ratio than debt schemes
- Lower Volatility than conservative hybrid funds
- All seasons proposition
- Tax Efficient*

**Fund of Funds which invest less than 65% of its total proceeds in units of Debt Oriented Mutual Fund Schemes.

*Please refer next page for details In view of individual nature of tax consequences, each unit holder is advised to consult his/her own professional tax advisors.
