

## Value unfolds over time

### Mahindra Manulife Value Fund

(An open-ended equity scheme following a value investment strategy)

Cno02293

#### What is Value Investing?

- Value investing is about identifying and investing in stocks that are underpriced or are at a discount to their intrinsic value.
- Intrinsic value is the true potential of the stock

#### Reasons for a mismatch between Price and Intrinsic value:

- Over-reaction (undue optimism/pessimism)
- Under-attention from the markets
- Temporary/short term issues or shocks that can dissipate over time

Source: Investopedia | The above information is for illustration purpose only.

#### Where can we find Value Opportunities?

##### Markets (Asset Allocation)

- Transitional crisis or uncertainties may create opportunities in the broader markets
- Markets become cheaper, allowing for a potential increase to equity allocation across market caps in portfolio and vice versa.

##### Sectors

- Temporary changes such as price shocks in raw materials, international disruptions, government policies, regulatory changes etc.
- These factors may tend to hurt near term profitability and valuations without changing longer term dynamics of the sector

##### Individual Stocks

- Short term issues (on pricing, demand-supply margins), management changes, regulatory matters and business turnarounds
- Unlocking value through restructuring, mergers and acquisitions

## Capturing Value Opportunities

### Quality Companies Trading Below Intrinsic Value

- Companies with strong case of turnaround in Return on Equity and cash flows driven by market share gain
- Trading below historical averages multiples

### Companies in the Turnaround Phase

- Strong managements that are able to deliver growth stronger than peers and broader markets
- Change in government policies or regulations providing a boost to the sector

### Companies with Long Term Potential

- Companies which got de-rated because of weak sectoral economics now on the verge of recovery due to tailwinds.
- Companies that are currently underappreciated due to change in investment narrative (due to factors such as sustainability or ESG criteria) but retain ability to generate strong profits over time.

Disclaimer - The Opportunities mentioned above are only for illustrative purposes and should not be construed as a recommendation from Mahindra Manulife Mutual Fund (MMMF)/ Mahindra Manulife Investment Management Private Limited (MMIMPL).

## Mahindra Manulife Value Fund- Investment Strategy

The Scheme will follow an active investment strategy.

A value fund requires a longer time to realise its potential & hence is ideal for investors who have a medium to long term investment horizon. The identification of undervalued stocks would involve fundamental analysis of the company and/or sector.

The Scheme aims to provide long term capital growth by investing in a diversified portfolio of companies that are selected using attributes of value investing.

Identification of undervalued stocks will be based on the evaluation of various factors including but not limited to stock valuation, financial strength, cash flows, company's competitive advantage, business prospects and earnings potential.

Some of the measures that Scheme can use to look at the valuation of a company to determine whether it qualifies as a value stock may include but not limited to: a) present value of projected cash flows; b) price-to-earnings ratio c) price-to-book ratio; Please refer the Scheme Information Document for detailed investment strategy

## Scheme Details

**Investment Objective:** The investment objective of the Scheme is to generate long-term capital appreciation from a diversified portfolio of predominantly equity and equity related instruments of companies which are undervalued (or are trading below their intrinsic value). However, there is no assurance that the investment objective of the Scheme will be achieved. The Scheme does not guarantee/indicate any returns
